STEAM CLEANING, LLC

- Midwestern provides professional carpet, tile and upholstery cleaning using a high powered truck mount system to remove deep down dirt and stains.
- We provide our professional cleaning service with courtesy and respect for your home and/or business. At Midwestern we pride ourselves on quality workmanship and outstanding service. Customer satisfaction is our number one priority, and the basis of our steam cleaning business.
- Midwestern Steam Clean is a fully licensed and insured company that is able to handle any kind of cleaning project you may need for your commercial or residential space.
- "Steam cleaning" is the cleaning method nearly all carpet manufacturers recommend. It is the only cleaning method classified as "deep cleaning." Also, it the only method that doesn't leave cleaning agent in the carpet after cleaning.

CARPET & UPHOLSTERY CLEANING

- Any carpet will last longer when abrasive particles are removed regularly. Midwestern's steam cleaning system removes more than the dirt and other particles that cause your carpet to wear. Our cleaning system will also eliminate many of the disease causing organisms that thrive in your carpet. When Midwestern cleans your carpet; your family, friends and/or employees and customers will enjoy a healthier environment and you will be assured with results that look great.
- No harsh chemicals are used in our cleaning process. The key to effectiveness is through the use of highly heated water (250 degrees) that is applied to carpets and other fibers and then promptly and efficiently removed. This guarantees that no residual chemicals are left in your carpeting. The cleaned fibers are left only damp and the dirt has been removed into our truck. Your dirt leaves with us!
- We use a powerful heated pre-spray which is applied under pressure resulting in brighter traffic areas and effective removal of stains.
- We offer advanced stain protection that can be added to any carpet or upholstery cleaning. The advanced chemistry alters the molecular charge on the textile fibers to help prevent stains and soils from sticking to the fibers. This results in the highest level of protection from spills and tracked in soils.

TILE CLEANING

- Midwestern Steam Clean offers professional tile and grout cleaning. Our high pressure steam cleaning system uses over 500 psi to effectively remove grease and dirt from both the grout and the tile surface itself.
- Midwestern Steam Clean uses high impact jets for the deepest clean possible and an automatic vacuum compensator which leaves the floor dry.
